

DELHI PUBLIC SCHOOL VISAKHAPATNAM

HALF YEARLY REVISION ASSIGNMENT

Class- III

Date of Submission: on or before 07.09.2026

Subject: ENGLISH

I. Read the given passage and answer the questions that follow.

Honeybees are small insects that play an important role in nature. They live together in groups called colonies. A colony has three kinds of bees: the queen, worker bees and drones. The queen bee lays eggs, while worker bees collect nectar and pollen from flowers. Drones help the queen bee reproduce. Honeybees use nectar from flowers to make honey. They carry nectar to their hive, where it is changed into honey and stored in honeycomb cells. Bees also help plants grow by carrying pollen from one flower to another. This process is called pollination. Without bees and other pollinators, many plants would have difficulty producing fruits and seeds.

Honeybees communicate with one another through movements called the “waggle dance”. This dance helps worker bees show other bees where to find flowers. Honeybees are therefore useful not only for making honey but also for helping plants and crops grow.

MCQs

1. What is a group of honeybees called?
a. A herd b. A colony c. A pack
2. Which bee lays eggs?
a. Worker bee b. Drone c. Queen bee
3. What do worker bees collect from flowers?
