Subject: ENGLISH

Section A

1. Read the passage given below and answer the questions that follow:

Tell someone that you are going to a convention of accountants and you might get a few yawns, yet money and how it works is probably one of the most interesting things on earth. It is fascinating and almost magical, how money appeared on our planet. Unlike most developments we enjoy, which can be traced back to a source, civilisation or inventor, money appeared in places then unconnected all over the world in a remarkably similar way.

Consider the American Indians using Wampum, West Africans trading in decorative metallic objects called Manillas, and the Fijians economy based on whale's teeth, some of which are still legal tender; add to that shells, amber, ivory, decorative feathers, cattle including oxen & pigs, a large number of stones including jade and quartz, which have all been used for trade across the world, and we get a taste of the variety of accepted currency.

There is something charming and childlike imagining primitive societies, our ancestors, using all these colourful forms of money. As long as everyone concerned can agree on a value, this is a sensible thing for a community to do.

After all, the person who has what you need might not need what you have to trade. Money solves that problem neatly. Real value with each exchange, and everyone gaining from the convenience. The idea is really inspired, which might explain why so many diverse minds came up with it. Once the money is accepted as a form of exchange, those who produce, loan out, and manipulate the quantity of money are obviously in a very strong position. They are the "Money Changers".

"History records that the money changers have used every form of abuse, intrigue, deceit, and violent means possible to maintain their control over governments by controlling money and its issuance," said President James Madison.

Money, money, money, it's always just been there, right? Wrong. Obviously, it's issued by the government to make it easy for us to exchange things. Wrong again!

Truth is, most people don't realise that the issuing of money is essentially a private business and that the privilege of issuing money has been a major bone of contention throughout history.

On the basis of your understanding of the passage, answer ANY TEN questions from the twelve that follow.

- i. What is fascinating and almost magical?

2. Read the passages given below and answer any 10 questions that follow them: Tourists to Jammu and Kashmir have another attraction - a floating post office on the Dal Lake in Srinagar, the first in the country. 'Floating Post Office, Dal Lake' - claimed to be the only one such post office in the world is built on an intricately carved maroon houseboat, fastened on the western edge of the Dal Lake.

This post office lets you avail of all the regular postal services available in the country while being afloat.

The seal used on everything posted from Floating Post Office is unique

- along with the date and address, it bears the design of a boatman rowing a Shikara on the Dal Lake. The special feature of this post office is that letters posted from here carry a special design which has the picturesque scenery of Dal Lake and Srinagar city. These pictures reach wherever these letters are posted to and hence promote Kashmir as a tourist destination across the world.

This is actually a heritage post office that has existed since British times. It was called Nehru Park Post Office before 2011. But then the chief postmaster John Samuel renamed it as 'Floating Post Office'.

The post office's houseboat has two small rooms - one serves as the office and the other a small museum that traces the philatelic history of the state postal department. It has a shop that sells postage stamps and other products.

But for the locals, Floating Post office is more than an object of fascination. ₹2 crore is

deposited per month in Floating Post Office by communities living in and around the Dal Lake. The lake has several islets that are home to more than 50,000 people.

The greatest fear is the recurrence of 2014 like floods in which the houseboat had gone for a toss uncontrollably pushed by the flood. Rescue teams had to anchor it using the special mechanism in a nearby highland. Then it was brought back on the Dal after the water receded. The biggest boon is that at no time of the year do you need a fan in this post-office!

On the basis of your understanding of the passage, answer ANY TEN questions from the twelve that follow.

i. What is the location of the Floating Post Office in Srinagar?

a. On Dal Lake

b. Near Centaur

c. On Pari Mahal

d. Near post office
