

DELHI PUBLIC SCHOOL VISAKHAPATNAM ASSIGNMENT

October- November 2024-25

Class: V

Date of Submission: on or before 07.12.2024

Subject: ENGLISH

I. Read the given passage and answer the questions that follow.

As years tick by, the world's oceans are becoming more and more polluted. Humans are responsible for this pollution. Therefore, it is our duty to clean up the oceans around the world for future generations. Most of the pollution in our oceans start on the land. People throw trash into the nearest body of water, and it eventually ends up in the ocean. Many people and animals are affected by ocean pollution. In fact, more than 70% of the earth's surface is covered with ocean water, so it would be hard not to be affected by this pollution. Animals eat the debris that is floating in the water or washes on shore which damages their digestive system. Similarly, thousands of ocean animals are killed each year by toxins in the water. Not only animals are the victims of the pollution, humans are also affected by ocean pollution. Marine life is the main food source for many cultures around the world. Also many people enjoy beach and water activities, but who would want to be in the water with trash and chemicals. To tackle this problem, first of all, everyone needs to make an effort to dispose off their trash properly. Organise clean-up crews who walk the beaches and pick up trash before it makes it to the sea. It is important to recognize ocean pollution as a worldwide problem and contribute to the solution by donation time to the cause.

- How are humans responsible for ocean pollution?
- In what ways are animals affected by the ocean pollution?
- Complete the sentence:
Marine life is the main _____
- Find the word from the passage that means:
